Plant-based foods in Europe: How big is the market?

The Smart Protein Plant-based Food Sector Report

www.smartproteinproject.eu
Countries covered in this report

- Austria
- Belgium
- Denmark
- France
- Germany
- Italy
- The Netherlands
- Poland
- Romania
- Spain
- United Kingdom
## About the data (Nielsen MarketTrack)

### Market

**Two metrics:**
- Total for each country, including discount stores.
- Total for just discount stores.

**Countries:** Austria, Belgium, Denmark, France, Germany, Italy, the Netherlands, Poland, Romania, Spain, United Kingdom.

### Time frame

**Moving annual total (MAT) per calendar week (CW) for 2018 vs 2019 vs 2020.**

Depending on the country, the calendar week varied from CW39 to CW42.

### Facts

**Sales value** in €.

**Sales volume** in kilograms (Kg) or litres (L), depending on the product.

### Categories

Plant-based (PB) **meat**, milk, yoghurt, cheese, ice cream, and fish.

Including subcategories.

Varies according to availability in each country. Not all categories are currently available in all countries.

---

Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures. Single digit numbers are rounded to one decimal place. Double digit numbers are rounded to whole numbers. All calculations are based on the underlying unrounded numbers.
Plant-based sector overview: Europe

Sales value increased by 49% over the past two periods.

1. Key findings
2. Sector overview
3. Plant-based categories* deep dive
   a. Plant-based meat
   b. Plant-based milk**
   c. Plant-based cheese
   d. Plant-based yoghurt
   e. Plant-based ice cream

*Plant-based food categories shown here are the plant-based food categories that were available at the time of purchase.
**Plant-based milk was originally labelled "drink".
Key findings – Denmark

The sales value of plant-based food* grew 29% (€30m) over the past two periods, while sales volume increased by 46% (14m Kg/L). Discount stores recorded similar growth, at 31% (€14.5m) and 43% (7m Kg/L) respectively. Discounters had a high share in terms of sales value, at 48%.

The plant-based food sector is led by plant-based milk (€26m), followed by plant-based yoghurt (€4.7m). Plant-based meat and plant-based yoghurt showed the strongest growth in sales value (both at 16%).

The plant-based-meat sector (€29k) is dominated by plant-based refrigerated prepared dishes (e.g. nuggets, burger patties) (€13k) followed by plant-based frozen prepared dishes (e.g. nuggets, burger patties) (€12k). The segment grew 50% over the last two periods in terms of sales value, with a high discounter share, at 42%.

The plant-based milk market (€26m) is dominated by oat (€14m), followed by soya (€5.3) and almond (€4.5m). Oat has the strongest growth in terms of sales value (26%). Again, a high discounter share in terms of sales value, at 50%.

The plant-based cheese segment (€1410) is still in its early footsteps, with triple-digit growth in discounters over the past two periods.

*Includes plant-based meat (vegan and vegetarian, no dairy-ingredients), plant-based milk, plant-based yoghurt; all numbers refer to MAT CW40 2020 if not stated otherwise
Sales value grew 29% over the past two periods, while sales volume increased by 46%.

Key findings – France

The sales value of plant-based food* grew 21% (€355m) over the past two periods, while sales volume increased by 18% (125m Kg/L). Discount stores recorded even stronger growth, at 90% (€21m) and 112% (12m Kg/L) respectively. Discounters have a 6% share in terms of sales value.

The plant-based food sector is led by plant-based milk (€187m), followed by plant-based yoghurt (€87m) and plant-based meat (€80m). All categories showed strong growth.

In terms of plant-based meat (€80m), plant-based refrigerated meat (€68m) is the most dominant segment, followed by plant-based ambient (€7m) and plant-based frozen (€5m) meat. Plant-based frozen meat showed the strongest growth over the past two periods.

In terms of plant-based milk (€187m), almond (€72m) is the most dominant segment followed by soya (€41m) and oat (€21m). There is great subsegment variety (e.g. rice, hazelnut, coconut, >20 others).

In the plant-based yoghurt segment (€87m), plant-based flavoured yoghurt (€55m) is the most dominant subsegment, followed by plant-based plain (€17m) and bifidus (€11m) yoghurt.

*Includes plant-based meat (vegan and vegetarian), plant-based milk, plant-based yoghurt

Key findings – Germany

The sales value of plant-based food* grew by 97% (€817m) over the past two periods, while sales volume increased by 80% (310m Kg/L). Discount stores showed even stronger growth, at 114% (€202m) and 92% (101m Kg/L) respectively. Discounters had a 25% share in terms of sales value.

The plant-based food sector is led by plant-based milk (€396m), followed by plant-based meat (€181m). All categories showed double-digit sales growth in sales value in the latest period, with plant-based meat and fish showing triple-digit growth.

In terms of plant-based meat, plant-based refrigerated meat (e.g. burger patties, nuggets, minced) (€123m) is the most developed segment, followed by plant-based cold cuts and meat spreads (€29m). Sales shot up in the latest period, with a triple-digit growth in sales value, especially in discount stores.

In terms of plant-based milk (€396m), oat milk (€184m) had the highest sales value, followed by almond (€82m) and soya (€74m). Oat milk is on fire, especially in the latest period (105%).

The plant-based fish and plant-based cheese segments are both still in their early stages of development, with triple-digit growth in sales value. Plant-based fish products arrived on discounters’ shelves in the last period, for the first time.

*Plant-based meat (only vegan), plant-based fish, plant-based milk, plant-based cheese, plant-based yoghurt, plant-based ice cream; all numbers refer to MAT CW39 2020 if not stated otherwise.

www.smartproteinproject.eu
1. Key findings
2. Sector overview
3. Plant-based categories* deep dive
   a. Plant-based meat
   b. Plant-based milk**
   c. Plant-based yoghurt
   d. Plant-based cheese
   e. Plant-based ice cream

*Plant-based food categories shown here are the plant-based food categories that were available at the time of purchase.
**Plant-based milk was originally labelled 'PB drinks'.
The sales value of plant-based food* declined 1% (€425m) over the past two periods, while sales volume increased by 3% (140m Kg/L). Discount stores recorded similar growth rates, at 2% (€73m) and 0% (35m Kg/L) respectively. Discounters had a 16% share in terms of sales value.

The plant-based food sector is led by plant-based milk (€231m), followed by plant-based meat (€111m) and plant-based yoghurt (€43m). Plant-based milk (7%) also had the strongest growth in sales value, followed by plant-based ice cream (5%) and plant-based meat (1%).

The plant-based-meat (€111m) sector is dominated by plant-based meals (e.g. burger patties, nuggets, sausages) (€98m), with remaining sales coming from tofu (€8.0m) and plant-based cold cuts (€5.4m).

The plant-based-milk (€231m) sector is dominated by soya (€87m), followed by rice (€46m) and almond (€44m). Oat had the strongest growth in sales value in both periods (23%).

The plant-based ice-cream (€33m) sector is dominated by multipacks (€22m), followed by household packs (€11m). The sector showed double-digit growth in sales value over the past two periods.

*Includes plant-based meat (vegan and vegetarian), plant-based milk, plant-based yoghurt, plant-based cheese, plant-based ice cream; all numbers refer to MAT CW39 2020 if not stated otherwise.
Sales value declined 1% over the past two periods, while sales volume increased by 3%.

**Sales value of plant-based food** in Italy (total incl. discounters), in €, for MAT CW39 2018 vs 2019 vs 2020:

1. Key findings
2. Sector overview
3. Plant-based categories* deep dive
   a. Plant-based meat
   b. Plant-based plain milk
   c. Plant-based flavoured milk**
   d. Plant-based cheese
   e. Plant-based yoghurt

*Plant-based food categories shown here are the plant-based food categories that were available at the time of purchase.
**Plant-based flavoured milk was originally labelled 'flavoured drinks'.
The sales value of plant-based food* grew 50% (€291m) over the past two periods, while sales volume increased by 35% (72m Kg/L). Discount stores recorded even stronger growth, at 83% (€22m) and 58% (7m Kg/L) respectively. Discounters had a 10% share in terms of sales value.

The plant-based food sector is led by plant-based meat (€174m), followed by plant-based milk (€62m) and plant-based yoghurt (€43m). Plant-based cheese (140%) showed the strongest growth in sales value, followed by plant-based yoghurt (35%).

The plant-based meat (€174m) sector is dominated by plant-based burger patties (€42m), followed by plant-based stir fry (€33m) and plant-based meatballs (€21m). All segments showed strong growth.

The plant-based milk (€62m) market is dominated by almond (€20m), followed by soya (€19m) and oat (€14m). Oat milk (69%) showed the strongest growth in sales value.

PB cheese (€4.8m) had tremendous growth in sales value over the past two periods, at 400%. PB sliced cheese (€2.7m) was the top seller, followed by PB grated cheese (€1.2m), but no sales in discounters as yet. Several new segments entered the market in MAT 2019 (including PB cheese pieces, PB cheese rolls, and PB cream cheese).

*Includes: plant-based meat (vegan and vegetarian), plant-based milk, plant-based cheese, plant-based yoghurt. All numbers refer to MAT CW40 2020 if not stated otherwise.
Sales value grew by 50% over the past two periods, while sales volume increased by 35%.

MAT = Moving Annual Total
Soya clearly dominates the plant-based flavoured-milk market, followed by oat.

Sales of plant-based milk and milk alternatives matured during 2019, with a strong year-on-year rise in sales values of +11% and +7%, respectively. Sales volumes also increased in 2019 by +8% in plant-based milk and +1% in milk alternatives. However, growth was stronger in milk alternatives, with a further +11% in sales volumes and +4% in sales values in 2020.

Plant-based burger patties, stir-fry and meatballs lead the market. Strong growth in all subsegments was observed, with a +8% increase in sales values in plant-based milk and +41% in milk alternatives in 2019. A further +40% increase in sales values in milk alternatives was recorded in 2020.
PB sector deep dive: The Netherlands
